Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

The Journal of Geology is published semi-quarterly. ¶The subscription price is $3.00 per year; the price of single copies is 50 cents. ¶Postage is prepaid by the publishers on all orders from the United States, Mexico, Cuba, Porto Rico, Panama Canal Zone, Republic of Panama, Hawaiian Islands, Philippine Islands Guam, Tutuila (Samoa), Shanghai. ¶Postage is charged extra as follows: For Canada, 30 cents on annual subscriptions (total $3.30), on single copies, 4 cents (total 54 cents); for all other countries in the Postal Union, 53 cents on annual subscriptions (total $3.53), on single copies, 11 cents (total 61 cents). ¶Remittances should be made payable to The University of Chicago Press and should be in Chicago or New York exchange, postal or express money order. If local check is used, 10 cents should be added for collection.

William Wesley & Son, 28 Essex Street, Strand, London, are recognized as European agents and are authorized to quote the following prices: Yearly subscriptions, including postage, 14*s.* 6*d.* each; single copies, including postage, 2*s.* 6*d.* each.

Claims for missing numbers should be made within the month following the regular month of publication. The publishers expect to supply missing numbers free only when they have been lost in transit.

Business correspondence should be addressed to The University of Chicago Press, Chicago, Ill.

Communications for the editors should be addressed to them at The University of Chicago, Chicago, Ill.

Contributors are requested to write scientific and proper names with particular care and in citations to follow the form shown in the pages of the Journal.

Separates, if desired, must be ordered in advance of publication. Separates of leading articles will be printed as ordered, of which 50 (without covers) will be furnished *gratis*, the actual cost of the remainder (and covers, if desired) to be paid for by the author. The table below shows the *approximate* cost of separates consisting of plain text or text with line engravings. The actual cost may vary from the figures given, and will depend upon the amount of work in re-making the pages into forms, press work, paper, binding, etc. Separates containing half-tones may be expected to cost somewhat more than the rates given, the increase depending upon the number of cuts and the amount of work required upon them.

Number of copies	50	100	150	200
Letter-press, for 4 pages or less	$1.40	$1.60	$1.80	$2.00
Letter-press, for 8 pages or less	1.90	2.20	2.50	2.80
Letter-press, for 16 pages or less	3.20	4.00	4.60	5.30
Single plates (1 double=2 single)	.90	1.10	1.30	1.50
Covers, with title (paper like Journal cover) .	1.20	1.69	2.00	2.40

Entered March 20, 1893, at the Post-Office at Chicago, Ill., as second-class matter, under Act of Congress, March 3, 1879.

The Life History of Polysiphonia Violacea

By SHIGEO YAMANOUCHI, Fellow in Botany in the University of Chicago

54 pages, 10 plates, 8vo, paper, net $1.00, postpaid $1.05

Various authors have published accounts of investigations on the red algae, but the true life-history of the group has never been given. This paper presents first the results of the author's studies of the mitosis in germinating tetraspores and carpospores, and in the vegetative cells of mature plants; then comes an account of spermatogenesis, formation of procarp, fertilization, and development of the cystocarp; tetraspore formation is next considered, followed by a description of certain abnormalities; finally there is a discussion of the cytological phenomena and alternation of generations.

An Indispensable Book for Students of Botany

Methods in Plant Histology

SECOND EDITION—ILLUSTRATED

By CHARLES J. CHAMBERLAIN, PH.D.
Instructor in Botany in the University of Chicago

THIS BOOK contains directions for collecting and preparing plant material for microscopic investigation. It is based upon a course in botanical microtechnique, and is the first complete manual to be published on this subject. Free-hand sectioning, the paraffin method, the celloidin method, and the glycerine method are treated in detail. In later chapters specific directions are given for making such preparations as are needed by those who wish to study the plant kingdom from the Algae up to the flowering plant. Special attention is paid to the staining of karyokinetic figures, and formulas are given for the reagents commonly used in the histological laboratory. In preparing the second edition the author has kept in view the advance in the science since the book first appeared. Professor Klebs's methods for securing the various reproductive phases in the Algae and Fungi have been outlined in a practical way, and in general much more attention has been given to collecting material. New chapters deal with the Venetian turpentine method, microchemical tests, free-hand sections, special methods, and the use of the microscope. These changes and additions have enlarged the volume from 168 to 272 pages.

272 pp., 8vo, cloth, net, $2.25; postpaid, $2.39.
